SUMMARY

B.Tech graduate in Computer Science and Engineering (AI) with a solid foundation in Data Structures, Algorithms, and OOP using C++ and Python. Experienced in developing full-stack web applications. Currently working as a Software Developer, developing ERP software for the paper industry. Solved 450+ coding problems across LeetCode and CodeChef. Seeking SDE roles to apply problem-solving skills in building scalable, reliable systems.

EXPERIENCE

Dataman Computer Systems Pvt. Ltd. *Aug 2025 – Present*
Associate Software Developer Kanpur, Uttar Pradesh

- Build and maintained a full-stack ERP application used by 100+ enterprise users in the paper industry using Next.js, React.js, Node.js, SQL, and Tailwind CSS.
- Developed 8 ERP modules covering procurement, inventory, sales, order management, and gate operations, implementing end-to-end transactional workflows.
- Designed and integrated 40+ REST APIs and worked with 40+ SQL tables to implement business logic, CRUD operations, validation, and data-driven workflows.
- Developed 14 reports and registers for operational analysis across inventory, sales, stock, and order management.
- Built responsive and reusable frontend components with Next.js, React.js, and Tailwind CSS for consistent experiences across desktop, tablet, and mobile devices.
- Implemented authentication and role-based authorization and optimized frontend rendering and application logic, reducing page load time by 30%; collaborated with developers on feature development, debugging, and code reviews using GitLab for version control.

PROJECTS

Vyapar Pustika (ERP Software) | Next.js, Node.js, Express.js, PostgreSQL, Tailwind CSS — Project Link | Github

- Developed a full-stack procurement management system supporting end-to-end workflows for Requisitions, Indents, Enquiries, Quotations, and Purchase Orders.
- Built an interactive procurement dashboard with KPIs, pending approvals, monthly spending analytics, recent activities, and centralized module navigation.
- Developed transactional CRUD workflows and REST API integrations for managing procurement records, approvals, and business data.
- Implemented reports and data visualization for requisition tracking, pending indents, procurement spending, and operational activity, with a responsive UI across desktop, tablet, and mobile devices.

Sentimental Attendance System | Machine Learning, OpenCV, Node.js, Express.js, EJS, RESTful APIs — GitHub

- Developed a real-time attendance system that not only records attendance but also analyses facial expressions to recommend personalized poetry and songs.
- Applied facial emotion detection for six expressions using OpenCV and an ML model achieving 91% accuracy.
- Built a scalable backend with Node.js, Express.js and REST APIs, and a responsive frontend using Bootstrap, HTML, and CSS.

SKILLS

Languages: C/C++, Python, JavaScript/TypeScript, SQL.
Programming Skills: Object Oriented Programming, Data Structures and Algorithms, Linux, Version Control, DBMS.
Technologies and Tools: React.js, Next.js, Node.js, Express.js, RESTful API, Git/GitHub, Postman, Canva.
Databases and Analysis: MySQL, PostgreSQL, NumPy, Pandas, Matplotlib.

EDUCATION

Chhatrapati Shahu Ji Maharaj University, Kanpur, Uttar Pradesh *Dec 2021 – Jun 2025*
Bachelor of Technology in Computer Science (Specialization in AI) CGPA: 7.58/10.00

- Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Operating System, Computer Networking, Database Management System, Artificial Intelligence, Machine Learning.

ACHIEVEMENTS

- Solved 450+ problems on LeetCode (Max Rating 1709) — Profile Link
- Presented a research paper at ICRAECCT 2025, UIET-CSJMU on "Image Fusion Techniques in Computer Vision."
- Volunteered at AnsrCoach (a startup) to design web development video tutorials and documentation — Certificate
